SECURE AI RECRUITMENT

# The Problem Statement

## The Challenge

Modern recruitment has become increasingly difficult due to the growing number of applicants and limited recruiter time.

### Current Hiring Problems

#### Volume Overload

Thousands of resumes for every job opening

#### Time Consumption

Manual resume screening consumes significant time

#### Human Bias

Human bias affects hiring consistency

#### Keyword Limitations

Traditional ATS systems rely mainly on keyword matching

#### Cheating Detection

Technical cheating during remote assessments is difficult to detect

#### Scalability Gap

Organizations require scalable hiring solutions

 **Key Message:** Companies need an intelligent recruitment platform capable of automating the hiring lifecycle while maintaining fairness, transparency, and security.

# Our AI Solution

## Zecpath AI Platform

Zecpath AI automates the complete hiring lifecycle using Artificial Intelligence and intelligent decision-making.

### Core AI Modules

- Resume Semantic Parsing
- ATS Resume Scoring
- AI Screening Assistant
- HR Interview AI
- Technical Interview AI
- Machine Test Evaluation
- Behavioral Analysis
- Integrity Monitoring
- Decision Intelligence
- Automated Hiring Reports

### Platform Benefits

- Faster recruitment
- Consistent evaluation
- Reduced recruiter workload
- Explainable AI decisions
- Secure hiring process

# System Architecture

## System Architecture Overview

### Architecture Flow

### Architecture Flow

Frontend UI → API Gateway → AWS SQS Message Queue → AI Microservices → Main Database → Cryptographic Vault → Recruiter Dashboard

### Key Technologies

- JWT Authentication
- AWS SQS
- REST APIs
- Microservice Architecture
- Secure Data Storage

# Hiring Pipeline

## Intelligent Hiring Workflow

# AI Intelligence Features

## Intelligent Capabilities

### Semantic Resume Matching

Understands candidate skills beyond keyword matching.

### Behavioral Intelligence

Analyzes communication quality and behavioral indicators.

### Variance Analysis Engine

Identifies abnormal score inconsistencies across different interview stages.

### Dynamic ATS Scoring

Evaluates candidate suitability using intelligent scoring.

### Integrity Monitoring

Detects suspicious activities including excessive tab switching during assessments.

### Cryptographic Security

Protects hiring records using secure hashing and encrypted storage.

# Product Demonstration

## Live Demo Workflow

The demonstration will showcase the complete AI recruitment process.

### Demo Steps

1. Upload Candidate Resume
2. Resume Semantic Parsing
3. ATS Score Generation
4. AI Screening Interview
5. HR Interview Evaluation
6. Technical Assessment
7. Behavior & Integrity Analysis
8. Final Decision Generation
9. Recruiter Hiring Report

### Expected Outcome

The audience will observe how AI automates every stage of recruitment with minimal human intervention.

# Sample Candidate Evaluation

## Candidate Report

Candidate ID

Final Decision

SELECTED

### Integrity Status

No Risk Flags Detected

### Score Breakdown

### Recruiter Insights

- Excellent technical knowledge
- Strong communication skills
- High consistency across evaluations
- Suitable for immediate hiring

# Business Impact

## Business Value

### Benefits

70%

Reduction in Hiring Time

90%

Automation of Resume Screening

Improved recruitment  
accuracy

Reduced hiring bias

Faster recruiter decision-  
making

Scalable for thousands of candidates

Secure and transparent hiring process

 **Business Outcome:** Organizations can significantly reduce recruitment costs while improving candidate quality and hiring speed.

# Future Roadmap

## Future Enhancements

The platform can be extended with advanced AI capabilities.

### Planned Features

01

AI Video Interviews

02

Emotion Recognition

03

Candidate Coaching Assistant

04

Predictive Hiring Analytics

05

Large Language Model Integration

06

Adaptive Machine Learning Scoring

07

Continuous Learning Recommendation Engine

08

Real-Time Recruiter Dashboard
